2nd October 2002

To whom it may concern,

Acres of Love is a local HIV home in our Olivedale community and Olivedale Clinic, as part of our service to our community, has pledged to support this home and offer some essential services to it.

We have undertaken to teach Basic Life Support skills to the managers, caregivers and volunteers, as well as giving training in basic infection control procedures and education in the prevention of the spread and contamination of the HIV virus. At present one of the community General Practitioners, Dr Janeline Killops, affiliated to our hospital, is conducting weekly checks on whichever children are in need and one of our resident Pediatricians Dr. Klaus Lescher has voluntarily undertaken to attend to the more serious medical needs of the children.

We also collect jumble and donations from our staff towards helping the home achieve their goals and items that they need. It has been a pleasure to work with the managers of the home and we hope to build a relationship with them that will prove to be fruitful and beneficial to the fantastic work they do.

Yours truly,

Lynda Bleazard
